Abishek N

Full Stack Developer | Developer Lead

Coimbatore, India | +91 99949 34390 | abishekn0412@gmail.com | Portfolio: abishek-tech.netlify.app
LinkedIn: linkedin.com/in/abishek-n-487a54218 | GitHub: github.com/Abishek-0412

PROFESSIONAL SUMMARY

Full Stack Developer and Developer Lead with 4+ years of experience building scalable, high-performance web applications across e-commerce, SaaS and AI-driven platforms using React.js, Node.js, TypeScript, Go, PostgreSQL and AWS. Experienced in distributed system design, real-time communication with WebSockets, concurrency control and SQL query optimization, improving data retrieval efficiency by up to 40%. Implements observability with OpenTelemetry and Datadog, feature flags with Flipt, and AI agent workflows with LangGraph and LLMs. Mentors junior developers, leads end-to-end delivery across the full SDLC and collaborates in Agile teams with product, QA and design.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go (Golang), Python, SQL, HTML5, CSS3
Frontend: React.js, Redux, Zustand, Tailwind CSS, Bootstrap, Lodash, Responsive Web Design
Backend: Node.js, Express.js, GraphQL, REST APIs, WebSockets, Event-Driven Architecture, Microservices
Databases: PostgreSQL, MSSQL, SQL Optimization, Query Performance Tuning, Indexing, Caching
Cloud & DevOps: AWS (Lambda, EC2, RDS, SQS, Step Functions, Elastic Beanstalk), Terraform, CI/CD Pipelines
Observability: OpenTelemetry, Datadog, Distributed Tracing, Logging, Monitoring & Alerting, Flipt (Feature Flags), Google Analytics
AI & ML: LLMs, LangChain, LangGraph, AI Agent Development, Prompt Engineering, PyTorch, Computer Vision
Security: SQL Injection Prevention, Bot Attack Mitigation, Rate Limiting, Web Application Firewall (WAF), Load Balancing, Role-Based Access Control (RBAC)
Testing & Practices: Playwright, Git, GitHub, Agile/Scrum, Code Reviews, Linear

PROFESSIONAL EXPERIENCE

Full Stack Developer / Developer Lead
Brightspot Technology Solutions, Coimbatore, India | Mar 2022 – Present

- Designed and developed scalable full-stack applications for e-commerce and service platforms using React.js, Node.js and PostgreSQL.
- Optimized database performance through SQL query tuning and indexing, improving data retrieval efficiency by up to 40%.
- Implemented real-time WebSocket communication to synchronize payment and transaction statuses, and engineered concurrency control to prevent duplicate transactions and keep data consistent in high-traffic environments.
- Secured Node.js and PostgreSQL services with input validation, SQL injection prevention, bot attack mitigation, rate limiting, Web Application Firewall (WAF) and load balancing.
- Implemented distributed tracing with OpenTelemetry across microservices and configured Datadog for centralized logging, monitoring and alerting, enabling faster incident detection and resolution.
- Introduced Flipt feature flags for controlled deployments and gradual feature rollouts.
- Built real-time dashboards for application performance, errors and system health, and integrated Google Analytics (gtag.js) to track user interactions for data-driven product decisions.
- Reduced latency with caching, API optimization and efficient data access patterns, adding retry logic and fault tolerance for high availability.
- Led development across multiple projects through the full software development lifecycle (SDLC), coordinating with product, QA and design teams, and resolved critical production issues promptly to minimize downtime.
- Managed sprints and workflows in Linear, participated in Agile ceremonies (sprint planning, stand-ups, retrospectives), conducted code reviews and mentored junior developers to improve code quality and team productivity.

PROJECTS

Corksy – Multi-Site Wine E-commerce & POS Platform | React.js, Node.js, PostgreSQL, WebSockets

- Built a multi-site e-commerce platform integrating an online storefront with offline point-of-sale (POS) systems.
- Developed end-to-end reservation and booking modules covering experience creation, time-slot management and ticket lifecycle.
- Designed real-time inventory synchronization across multiple sales channels, with cart-hold reservations to prevent overselling.
- Integrated multiple payment providers and wallets, role-based access control (RBAC) and event-driven real-time order and payment updates.

Incentive Fox – Referral, Rewards & B2B Platform | AngularJS, MSSQL, REST APIs

- Developed a referral and loyalty platform with campaign management and a QR-based referral system.
- Integrated SVS and Tango gift card providers for automated reward fulfillment, plus Wufoo and Zapier for data collection and workflow automation.
- Built FTP batch data pipelines with validation and reconciliation of duplicate and failed transactions.
- Enabled B2B partner onboarding and built a customer dashboard for referrals, rewards and activity.

SpotMI – Matrimony Platform (Web & Mobile) | React.js, Node.js, GraphQL, PostgreSQL, Flutter

- Led development and delivery of the full-stack platform in 1 month with a small team, using AI-assisted development.
- Designed scalable GraphQL APIs and built cross-platform Android and iOS apps in Flutter.
- Implemented secure authentication, encrypted chat, privacy controls and automated validation of inappropriate image uploads.

aRa – AI Agent Platform | Python, LLMs, LangChain, LangGraph

- Designed an AI agent system that automates product content generation and development workflows.
- Automated generation of Software Requirement Documents (SRDs), test cases and structured product descriptions with LLM pipelines.
- Developed reusable prompt frameworks for consistent, reliable AI outputs.

Retina Watch – AI-Based Medical Imaging System | Python, PyTorch, Computer Vision

- Developed machine learning models that detect retina-related conditions from medical imaging data.
- Built data preprocessing and model training pipelines using image classification and anomaly detection.
- Integrated predictive models into application workflows for real-time analysis.

EDUCATION

M.Sc. B.Ed. in Computer Science
Government College of Arts and Science, Coimbatore | 2022

DEVELOPER TOOLS

VS Code, Cursor, Cursor CLI, Claude CLI, Codex CLI, Antigravity, Linear, NPM
